

LIYANDER RISHWANTH L

Security Engineer | Cloud Security and DevSecOps | Vulnerability Research

Nagercoil, Tamil Nadu, India | +91 8610164765 | liyanderrishwanth18@gmail.com
[linkedin.com/in/liyanderrishwanth](https://www.linkedin.com/in/liyanderrishwanth) | github.com/liyander | app.hackthebox.com/public/users/1914322

PROFESSIONAL SUMMARY

Security Engineer specializing in cloud security, DevSecOps, application security, and offensive security research. Published 18 Common Vulnerabilities and Exposures (CVEs), including a maximum-severity (10.0) remote code execution finding, with security acknowledgments from Apple, Microsoft, Oracle, and Google. Invited to the Microsoft Security Response Center (MSRC) Researcher Celebration at Black Hat USA 2026. Skilled in securing AWS and Azure cloud infrastructure, hardening CI/CD pipelines with Kubernetes and Terraform, penetration testing, threat detection engineering, and incident response.

TECHNICAL SKILLS

Cloud and DevSecOps: Amazon Web Services (AWS), Microsoft Azure, Identity and Access Management, Kubernetes, Docker, Terraform, Jenkins, Prometheus, Grafana, Continuous Integration and Continuous Delivery Security, Infrastructure as Code, Container Security

Security and Monitoring: Burp Suite Professional, Metasploit, Nmap, Nessus, Wireshark, Splunk, Ghidra, Postman, Security Information and Event Management, Vulnerability Management, Threat Intelligence, Threat Detection Engineering, Incident Response

Offensive Security: Penetration Testing, Active Directory Exploitation, Adversary Emulation, Red Teaming, Endpoint Detection and Response Evasion, Application Programming Interface Penetration Testing, OWASP Top 10, Authentication Bypass, Privilege Escalation, Lateral Movement

Languages and Frameworks: Python, JavaScript, Bash, PowerShell, React, Node.js, Express, Flask, MongoDB, MySQL

Certifications: API Security Certified Professional (ASCP), GitHub Advanced Security, TCM Security SOC 101, API Penetration Testing, Practical Web Hacking, Linux Privilege Escalation

PROFESSIONAL EXPERIENCE

Security Engineering Intern, Black Pearl DFIR

Mar 2026 to Present, Remote

- Engineered a centralized threat intelligence dashboard for Tata Agritas, improving enterprise threat visibility across 5 critical networks and systems.
- Reduced incident resolution time by 30 percent and saved 15 hours weekly by automating response workflows and analyzing 50 threat alerts per week.

Cybersecurity Intern, Indian Space Research Organisation (ISRO)

Dec 2025 to Jan 2026

- Performed comprehensive risk assessments across 6 secured aerospace network segments and partnered with incident response teams to manage complex threats.
- Improved workflow efficiency by 25 percent by investigating critical event logs and authoring 10 standardized incident response protocols.

VULNERABILITY RESEARCH

Published CVEs (18 Records)

- Reported a remote crash in the Apple Swift-NIO WebSocket frame decoder ([CVE-2026-43678](#)) triggered by excessive 64-bit payload lengths, disclosed through an official GitHub security advisory.
- Prevented full host compromise by disclosing a maximum-severity (10.0) path traversal and remote code execution chain in Google Mesop AI ([CVE-2026-33054](#), [CVE-2026-33057](#)).
- Protected cloud storage integrity by identifying authorization bypasses and unauthenticated credential exposures in the

Budibase Platform ([CVE-2026-50137](#)).

- Uncovered an access control flaw in Directus CMS ([CVE-2026-35441](#)) enabling unauthorized access and data exposure.

Microsoft, Oracle, and MSRC Recognition

- Discovered and responsibly disclosed 5 vulnerabilities across Microsoft (3 infrastructure flaws) and Oracle (2 critical software defects) products.
- Earned an [invitation to the Microsoft Security Response Center \(MSRC\) Researcher Celebration](#) at Black Hat USA 2026 for impactful defensive contributions.

Apple Product Security and Bug Bounty

- Filed 2 official GitHub security advisories in Apple Container by identifying an integer overflow and a symlink traversal flaw.
- Evaluated security for 5 global entities, including NASA, Harvard, and the Australian Government, disclosing major weaknesses under authorized testing.
- Mapped attack surfaces for 2 large language models, achieving logic bypasses of Gemini and Grok with reported data exfiltration pathways.

PROJECTS

DevOps Defender, AI-Driven DevSecOps

- Architected an AI-driven agent that autonomously analyzes logs, identifies root causes, and deploys remediations, reducing CI/CD pipeline downtime by 40 percent.
- Integrated a diagnostic engine across Kubernetes, Terraform, Jenkins, ArgoCD, Prometheus, and Grafana using telemetry pipelines to monitor system health.

Cybersecurity Academy Platform, AI-Powered LMS

- Directed an end-to-end AI platform serving 500 users with hybrid labs, automated skill-gap analysis, and personalized job matching.
- Developed an administrative dashboard using MongoDB, Express, React, Node.js, and MySQL that tracks progress and performance metrics for 500 users.

Cybersecurity Range Platform, Training Environment

- Built an attack-and-defend range hosting 100 active Capture the Flag, privilege escalation, CVE, and blue-team challenges.
- Designed APT adversary-emulation modules with 5 custom Active Directory environments using Python and Flask for domain-compromise training.

EDUCATION

B.Tech in Computer Science and Engineering (Cybersecurity), Sri Shakthi Institute of Engineering and Technology, Coimbatore. GPA: 8.6 out of 10.0 2023 to 2027

AWARDS

- Exploit-X Winner, International Hacking Event (CTF), KPR and EC-Council.
- HackQuest 2nd Runner-Up (two times), National Level Hacking Event (CTF), JMC and CyberHeals.
- ACNCTF Runner-Up, National Level Hacking Event, Amrita Vishwa Vidyapeetham Chennai.
- L3m0nCTF Winner, National Level Hacking Event (CTF), Amrita Vishwa Vidyapeetham Coimbatore.
- KICTF 2nd Runner-Up, State Level Hacking Event, Kumaraguru Institute of Engineering and Technology.
